

FREE COVID-19 PCR Testing for your Business, School or Organization

- No cost to the patient or the organization per The CARES Act mandate
- Highly Accurate lab based PCR-RT Tests
- Detects new COVID strains
- Results within 24 hours
- Turnkey Solution - Medi-Wheels provides all personnel, equipment and supplies
- 100% HIPPA Compliant
- Direct sample types include:
 - Saliva
 - Nasal Anterior (lower nasal swab)
- The entire system is quick and efficient with online and electronic tracking and reporting, thus making the process quick, efficient and as non-intrusive to daily operations as possible
- 24/7 online access to testing results and history
- Integrates with all contact tracing applications
- CLIA Accredited Laboratories
- Provide testing for those in your organization who need proof of testing before traveling.

The Medi-Wheels free testing program includes having an Abbott Labs ID NOW™ System on-site for instant molecular based testing. In the event of an outbreak, time is of the essence to test all the people in which a positively tested patient came in contact.

Having a molecular based system on-site will provide instant results for contact testing without the need to send tests off to the lab. The molecular test can also detect COVID many days before a rapid test, thus saving precious hours and days in detecting the spread of the virus and saving more lives.

Getting setup is easy

Here are the steps...

1. Company/Organization Registers with Medi-Wheels by completing the Medi-Wheels Initial Information Form (IIF).
2. Medi-Wheels will send the Medi-Wheels Testing Services Agreement to Company/Organization.
3. Upon receipt of the executed Testing Services Agreement MW will complete the onboarding procedure and set the Company/Organization up in the MW system.
4. Medi-Wheels provides Company/Organization a dedicated website link for it's Employees/Students (or guardians) to register and complete the testing consent form online. Each participant is issued a unique QR Code that they will use to identify themselves at the time of testing.
5. Medi-Wheels will arrange for a MW contracted provider to collect samples on the agreed upon testing schedule.
6. Medi-Wheels will ship to each location/campus the test collection kits each with a unique barcode identifier.
7. Testing is quick and easy. Participants show their unique QR code to the collector who then scans the QR code and scans the code on the test kit that is give to the participant, thereby assigning the kit to said participant.
8. Upon samples being collected, the samples are overnighted that day back to the MW lab for processing.
9. Upon completion of testing, which is usually within 6-8 hours of receiving at the lab, test results will be emailed to the contact person at each organization and location, as well as sent via text/email to the person tested or to their guardian, if they are a minor.
10. If there are any positive test results, MW will immediately begin testing all persons who came in close contact with the positive patient using the onsite molecular system, thus saving valuable and life saving time by acting immediately.

INTRODUCING

ID NOW™ COVID-19

MOLECULAR. IN MINUTES™.
ON THE FRONT LINE.

Detects novel coronavirus in as little as 5 minutes^{1*}

- Leading molecular point-of-care (POC) platform in the United States, trusted by hospitals, physician offices and urgent care facilities nationwide
- High-quality molecular technology targeting COVID-19 RdRp gene
- Emergency Use Authorization (EUA) supports flexible near-patient testing environments
- Direct sample types include:
 - Throat swab
 - Nasal swab
 - Nasopharyngeal swab
- ID NOW™ platform designed with POC in mind

Proudly Used by :

ID NOW™ COVID-19

SPEED – Positive result in as little as 5 minutes, negative results in 13 minutes.¹

Timely results enable healthcare professionals to make appropriate and more efficient treatment and infection control decisions.

ID NOW™ COVID-19

TECHNOLOGY – ID NOW™ utilizes proven isothermal molecular technology in an intuitive platform, providing the fastest molecular results in the market¹

EASE OF USE – Simplifying the test process

- Designed for near-patient testing in a variety of environments**
- Assay kit contains all necessary components for testing, including:
 - 24 tests
 - Swabs for sample collection
 - Positive and negative control swabs
- Room-temperature storage eliminates need for refrigeration

The ID NOW™ COVID-19 EUA has not been FDA cleared or approved. It has been authorized by the FDA under an emergency use authorization for use by authorized laboratories and patient care settings. The test has been authorized only for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens, and is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of *in vitro* diagnostic tests for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

*ID NOW™ COVID-19 detects positive results in as a little as 5 minutes. Negative results detected in 13 minutes.

**Please see ID NOW Instrument user manual for additional operating environment requirements.
